	<div><div>AMCAT</div><div>Amcat Topper</div><div>Jun 2014</div></div> <div><div>IIT</div><div>Modern Application Developer</div><div>Jun 2017</div></div>	PROFESSIONAL EXPERIENCE	
	<div><div>Bank of America</div><div>Senior Software Engineer</div><div>Jun 2018 - present</div></div> <div><div>• Creation/Enhancement of restful apis to support large scale banking applications in a multi threaded trading environment. As part of Winter Code Freeze created message Queue browser using latest trending front end technology reactJs to ease the development process.</div></div>		
	<div><div>Mr.Cooper</div><div>Software Engineer II</div><div>May 2017 - Jun 2018</div></div> <div><div>• Design can never be static and Web development is changing every second, those aspects drive my role in this company. As I had to constantly look for achieving easy navigation, user friendliness and high functionality in the customer facing mobile application with the latest UI technologies. Participated in screen design discussions and submitted a couple of ideas for implementation. Apart from this, I took a peek into the Innovation Hackathon and created a mobile application named cooperCommute using latest hybrid mobile application framework.</div></div>		
	<div><div>Cognizant Technology Solutions</div><div>Programmer Analyst</div><div>Dec 2014 - May 2017</div></div> <div><div>• This role requires me to enhance the existing back end functionality as per client requirement. Played a key role in production bug fixes and BAU activities in agile methodology. In addition to back end Ive had got the opportunity to improve the look and feel of our clients customer facing web application name Scopus.</div></div>		
	<div><div>Personal projects</div><div>Freelance Developer</div><div>Dec 2014 - Dec 2018</div></div> <div><div>LockerPhone:</div><div><div>• As a freelance developer Ive created a mobile application named LockerPhone from the scratch. Its aim is to maintain the connection between a mobile and its owner when he/she is not allowed to take mobile into office space.</div></div><div><div>LockerPhone2.0:</div><div><div>• The LockerPhone application version 1 had a lot of architectural flaws which made me to unpublish the app from Google playStore. All those issues were addressed in this app with good design.</div></div></div></div>
